

Discover Engaging Reading Passages and Literacy Resources for Your Classroom

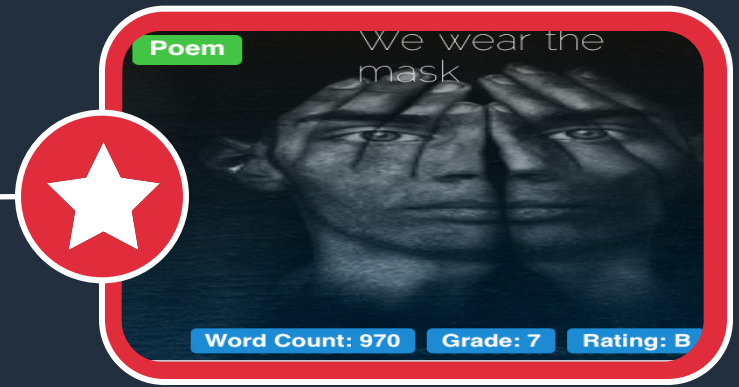

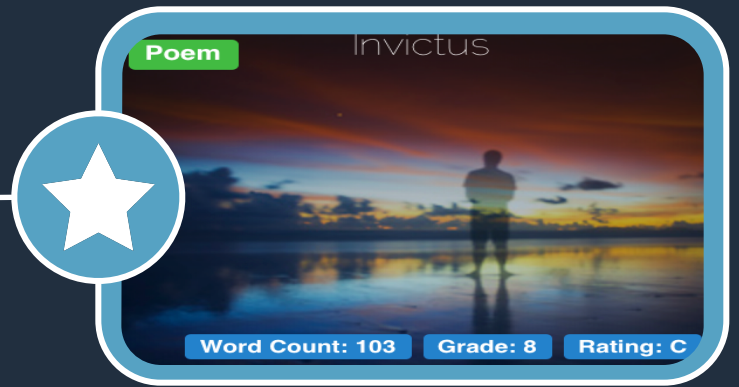

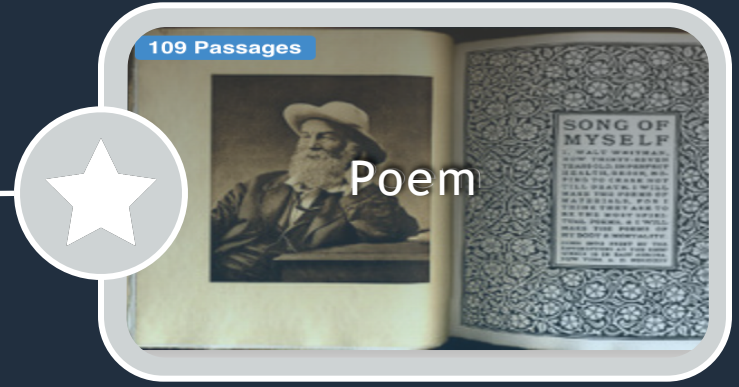

Lumos Learning with its proven history of helping schools raise student achievement through years of dedication to building the most effective online and printed resources, has created a new literature feature that is easy to navigate and allows teachers to select passages based on Lexile Levels, Grade Level, Word Count or Difficulty Level.

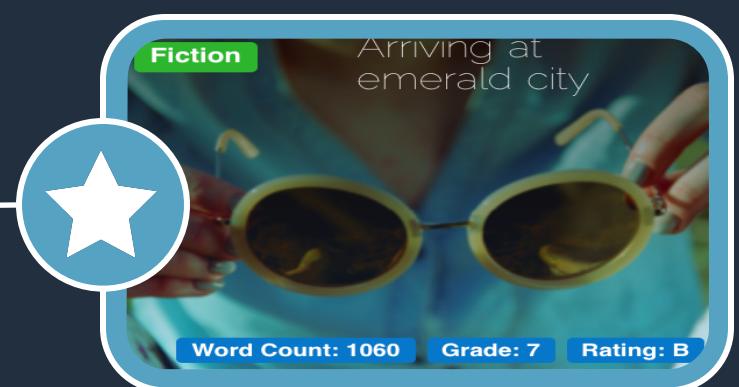

Save Time
Because these passages are organized by subject and integrated into EdSearch, teachers will effortlessly find other resources that support the passages and associated questions they are introducing to their students.

Rating
Rating Levels allow teachers to assign reading passages based on an individual student's reading level. Rating Level A provides a higher difficulty passage while a Rating Level of C offers more simple text.

Lexile Levels
Many passages in this new feature offer a Lexile Level so teachers may easily differentiate in their classroom based on student ability.

"This ability to find reading assignments that meet the needs of a specific classroom will save Language Arts teachers a lot of time. I am excited about its addition to EdSearch!"
- MK, Founder, Lumos Learning

We are focusing on developing learning platforms for students to succeed in the new technological age. Our mission is to provide students, teachers and parents with high quality content and collaborative learning platforms by leveraging innovations in digital and print media.
